

Task 1 -> install ubuntu

1- Download iso File from <https://ubuntu.com/download/desktop>

2- Download Rufus app for boot the flash from
<https://soft98.ir/software/14690-Rufus.html>

3-Use the Disk Management Tool for Detect hard drive format

4-Then we boot the flash according to the hard drive format with the Rufus app

5-Go to the system BIOS and select the flash

6-Because I wanted a single operating system, I did not Shrink the Hard anymore and deleted all the data in the laptop
